CM-20CC

DVD Case Closer

CM-20 Series Line up

Automating Downstream Process

The Otari CM-20CC Case Closer provides the capability of automating the whole process of DVD packaging up to wrapping.

Upon receiving opened DVD cases (with discs and leaflets inserted) from the upstream conveyor, the CM-20CC automatically closes and feeds them to the downstream conveyor.

The machine can accept various types of cases such as DVD Amarey® type, Warner® type, and VCD (half) cases.

By placing the CM-20CC at the end of the CM-20 DVD packaging line and by connecting it to a shrink film wrapping machine, a very compact automated line can be constructed.

Each of the CM-20 series machines is designed to occupy a minimum space for ease of line arrangement and to be used as an add-on unit to automate the required process.

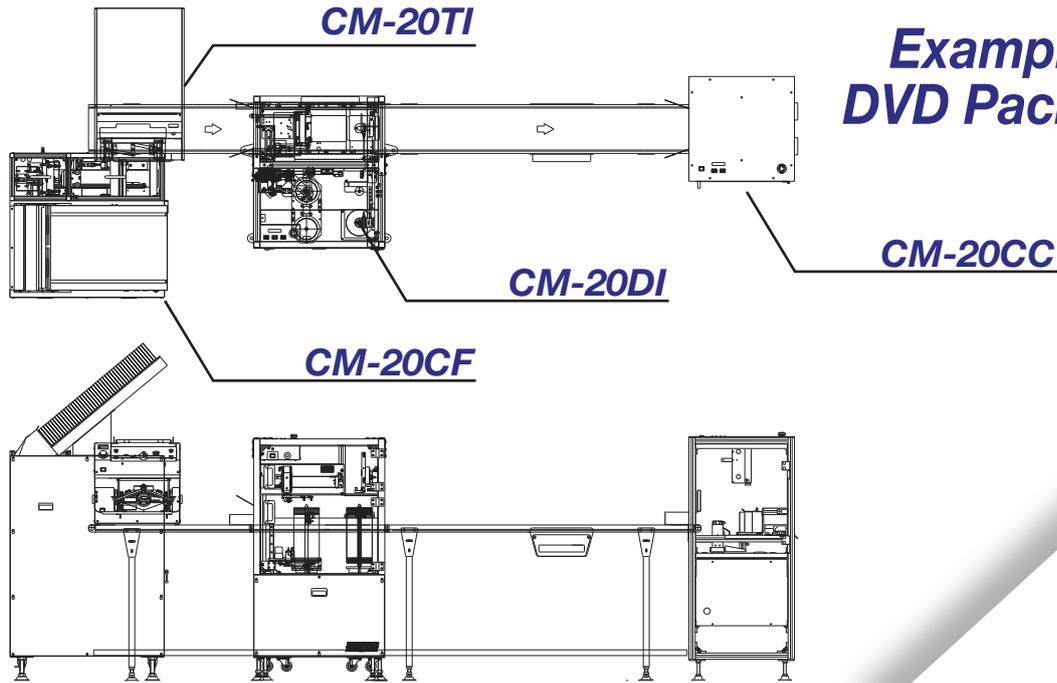

Specifications

Common to CM-20 Series Machines

Operation Speed: 20 cases per minute

Supported Case: DVD tall case (no bend or deformation)

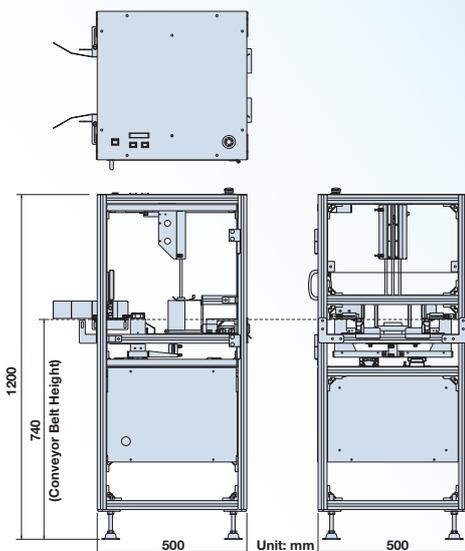

Case Dimensions (H x W x D): 191 x 136 x 15 (regular) or 7.5 (slim) mm

Example of CM-20 DVD Packaging Line

Controls & Indicators	POWER switch, LCD, EMERGENCY STOP switch, START button
Dimensions (W x H x D)	500 x 1200 x 500 mm
Weight	52 kg
Electric Power	100-240 VAC \pm 10%, single phase 50/60 Hz
Power Consumption	Max. 250 VA
Compressed Air	Primary side pressure = min. 0.5 MPa (dry air)
Air Consumption	Max. 25 litre per minute (A.N.R.)

Specifications are subject to change without notice or obligation.
